## HOSGELDINIZ WELCOME TO EUROPORT ISTANBUL!

From 4 – 6 November 2026, the international maritime industry will gather again in Yenikapi Expo Center to celebrate the 8th edition of Europort Istanbul.

In the past decades Europort has built a strong brand reputation in Türkiye. In its previous edition, Europort Istanbul welcomed almost 6,000 professional visitors from 52 nations, hosted 441 exhibitors from 35 countries including country pavilions from The Netherlands, Greece, China and Poland, underlining its status as the region's leading international maritime technology and shipbuilding exhibition.

We look forward to welcome you as an exhibitor allowing you to showcase your technologies to Turkish yards and the broader regional supply chain of shipowners, subcontractors, and technology partners.

## ISTANBUL MARITIME HUB

Situated at the crossroads of Europe, Central Asia, and the Middle East, Istanbul is the beating heart of Türkiye's maritime industry. The greater Istanbul region - including Tuzla, Yalova and Izmit - hosts over 120 active shipyards forming one of the most diverse and capable shipbuilding clusters in the region.

Turkish shipyards are globally recognized for their flexibility, engineering competence, and fast delivery. They produce a wide range of vessels, including tankers, Ro-Ro vessels, passenger ferries, fishing boats, tugs and workboats, naval and patrol ships, heavy-lift and offshore support vessels, bulk and container carriers and superyachts. In recent years, there has been a notable rise in eco friendly projects such as hybrid-powered vessels and LNG-powered ships.

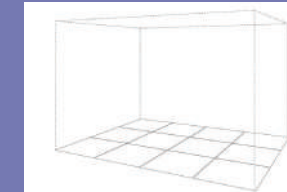

While the industry operates in a competitive global environment, Turkish shipyards continue to maintain strong activity levels supported by a steady flow of repair, conversion and retrofitting contracts.

## STRATEGIC VENUE LOCATION

Strategically organized in Istanbul's seaside at Yenikapi, the venue creates excellent access to international visitors, both located close to Istanbul International Airport as well as the historic city center. Moreover, the event will again feature a dedicated ferry shuttle service connecting directly to the Tuzla shipyards region.
